**Flag:** Follow up

Here's the map of county data with CSD vs non-CSD fields. There are 106 fields all together in the county's study area. 88 of them are CSD application fields (83%). All but 2 contaminated wells (above 10 mg/l) are directly downgradient of the CSD facility or CSD application fields. The two wells are downgradient of both CSD and non-CSD application fields.
